SUMMARY

Back-end developer with about 2 years of professional experience with Java at General Motors, building automation and integration solutions for industrial processes. I develop REST APIs with Java 21, Spring Boot, Spring Security, JPA/Hibernate and PostgreSQL, running on Docker and versioned with Git.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, PHP, SQL

Back end: Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, REST APIs, MapStruct, Django

Databases: PostgreSQL, MySQL, Flyway

Tools: Docker, Git, GitHub, IntelliJ IDEA

Front end: React, JavaScript

Methodologies: Agile (Scrum)

Languages spoken: Portuguese (native), English (advanced)

PROFESSIONAL EXPERIENCE

Industrial Robot Programmer

General Motors do Brasil – São José dos Campos, SP | Jul 2024 – Present

- Developing automation and integration solutions for more than 250 industrial processes.
- Using Java in supervision, monitoring and data analysis systems for production lines.

IT Maintenance and Support Technician

Retífica Paraíso LTDA – São José dos Campos, SP | Jan 2022 – Jul 2024

- Maintenance of computers and industrial machines; software installation and configuration.
- Technical support for users and basic network and equipment configuration.

Technical Support Intern

Lotus Cell – São José dos Campos, SP | Jan 2021 – Jan 2022

- Ticket analysis and resolution, including SQL database queries.
- Supported application maintenance, feature validation and bug identification using Python and Django.

SENAI Apprentice

General Motors do Brasil – São José dos Campos, SP | Jan 2019 – Dec 2020

- Maintenance and operation of industrial systems, automation, equipment control and technical diagram reading.

PROJECTS

Finance API – Personal finance REST API

github.com/MathFe/finance-api | Java 21, Spring Boot, Spring Security, JWT, PostgreSQL, Docker, Flyway, MapStruct, React

- User registration and authentication with JWT; management of categories and financial transactions.
- Layered architecture (entity, repository, DTO, service, controller) and database migrations with Flyway.
- PostgreSQL database running in a Docker container and a basic React front end.

Production Control System – Press Line (in progress)

github.com/MathFe/production-control | Java 21, Spring Boot, PostgreSQL, Docker, Flyway, MapStruct

- Control of raw materials, production orders and finished goods inventory, based on a real industrial process.
- Business rules with order state transitions (planned, in progress, completed) and stock levels (high, medium, critical).

EDUCATION

Bachelor's Degree in Computer Science (in progress)

Universidade Paulista (UNIP) – São José dos Campos, SP | Jan 2026 – Dec 2029

Postgraduate Degree in Artificial Intelligence and Machine Learning

Anhanguera – São José dos Campos, SP | Jan 2024 – Oct 2025

Associate Degree in Back-end Development

Anhanguera – São José dos Campos, SP | Jan 2021 – Jan 2024
